7. Strategy

- a. The opportunity landscape over medium to long term horizon remaining unchanged with the total addressable annual mining replacement market estimated at around 3 million TPA coupled with a very low penetration of high chrome consumable wear parts in mining. Bulk of future growth is expected to come from outside India and that too mainly in mining segment.
- b. Apart from significant cost reduction due to much lower wear rates, high chrome solutions also bring about benefits like improved process efficiencies, reduction in other consumables (other than high chrome consumables), improved environmental benefits, etc. which are other key growth drivers.
- c. Incremental volume growth in Mining estimated to be in the range of 40,000-50,000 MT per year from FY 2018-19 onwards.

8. Key Highlights/Developments

- A. Mining Sector sales increased on account of continued business penetration efforts in the sector.

- B. Order book as at 1st July 2018: Rs. 835 Crores.

- C. Outstanding foreign currency forward contracts (sales contracts) as of 30th June-2018: US \$ 59.00 MIO, EURO 1.05 MIO, ZAR 66.50 MIO.
